Millistream expands its coverage of Nordic fundamentals and corporate actions data

The Nordic market data provider Millistream continues to broaden its production of added value content.

Millistream's primary business is to deliver real-time and historical market data to the professional financial market. Besides that, a growing business segment is the production of added value content. Today, Millistream offers a wide range of company information, including company descriptions, fundamentals, ownership data and corporate actions.

- We have experienced an increase in the interest in fundamentals and corporate actions data from our clients, says Tomislav Nizic, Content Manager at Millistream. Having its own content department in Gothenburg and Stockholm, Millistream has also established relations with staff and content partners across Scandinavia.

Millistream offers the most detailed Nordic content on the market. For example, we produce and continuously update company descriptions for all listed Nordic companies in all local Nordic languages, says Tomislav Nizic.
