### Agreement
An agreement, together with any Schedule, Rider or other attachment, as may be amended by the parties from time to time.

**Source**: 8. Model Contract Guide

### Auditor
An entity that conducts an audit – either the **Information Provider** or a **Third-Party Auditor** acting on its behalf.

**Source**: 1. Audit BPR

### Audited Party
An entity that contracts or subscribes to receive the **Information** and is being reviewed by the **Auditor**.

**Source**: 1. Audit BPR

### Backward Compatibility
Change to data delivery system that allows vendors and consumers to successfully employ new systems for receipt before data sources initiate new deliveries.

**Source**: 2. SL&C BPR

### Contractor
A person or company with whom a **Vendor or Subscriber** has contracted to perform services normally provided by an employee of the firm.

**Source**: 6. Internal Admin BPR

### Delayed Information
**Information** made available after (a) a defined time has elapsed from the time that the **Information** was first made available by the **Information Provider** or (b) a specified time of day.

**Source**: 7. BIPPS – UofC, Sub Agmts, and Delay Interval 8. Model Contract Guide

---

**Source of Definition:**

7. BIPPS Recommendation for Unit of Count, Subscriber Agreements, and Delay Intervals [http://ow.ly/hyyr301cX2S](http://ow.ly/hyyr301cX2S)
### Derived Data

**Definition:** Pricing data or other information that is created in whole or in part from the **Information** and that cannot be (1) readily reverse-engineered to recreate the **Information** or (2) used to create other data that is a reasonable facsimile for the **Information**. While the FISD recommends consistency in terminology whenever possible, it notes that “Derived Data” is also referred to by certain Information Providers as “New Original Works” and “Original Created Works”.

**Source:** 4. Derived Data BPR

### End User

**Definition:** A natural person that a **Subscriber**, a **Vendor** or a **Sub-Vendor** permits to receive **Information**.

**Source:** 5. Non Display BPR 7. BIPPS – UofC, Sub Agmts, and Delay Interval 8. Model Contract Guide

### Fallback Capability

**Definition:** Change to data delivery system that allows data source to utilize a previous version of the product in event of problems with a new implementation.

**Source:** 2. SL&C BPR

### Hot Cut Implementation

**Definition:** Change to data delivery system or process without a parallel implementation. This implementation is frequently referred to as a “Big Bang Implementation” and typically occurs without any “phase-in” aspect(s).

**Source:** 2. SL&C BPR

<td></td>
</tr>
</tbody>
</table>

The diagram below illustrates the flow of financial information among several participants in the process. Note that a single organization can fill multiple roles (e.g., a bank may be both a Subscriber to Information and a Sub-Vendor of Information to other Subscribers).

The Information Provider is the source of the Information.

The Vendor receives Information directly from the Information Provider.

The Sub-Vendor receives Information from a Vendor (or another Sub-Vendor).

The Subscriber receives Information from an Information Provider, either directly or via a Vendor (or Sub-Vendor), for the purposes of using it internally. Distribution of the Information within the Subscriber may be controlled by the Subscriber or a Vendor.

The End User represents a natural person within a Subscriber. In instances where the individual contracts for the Information on his or her own behalf (e.g., an individual investor accessing it via an online broker) then the End-User and the Subscriber may be identical.

When the Glossary refers to an organization (e.g., Vendor, Subscriber, Information Provider, etc.), it is generally referring to the organization’s group – affiliates and subsidiaries bound to a common contract or business relationship - and not just one specific legal entity.
