

Audit Software Certified by SIIA

SIIA encourages all companies to be software compliant. To accomplish this, companies should perform routine audits of their software assets. The audit software listed below allows companies to determine what software is installed on their systems and determine whether it is properly licensed.

These audit tools have been certified by SIIA and have met SIIA's standards for accuracy, reliability, and ease of use for performing audits.

SIIA does not endorse any particular audit tool from this list but encourages companies to investigate each audit tool and choose the one that is compatible with their operating systems and is best suited to achieve their objectives.

To view a recorded demonstration of CDW Software Asset Manager, visit <http://www.cdw.com/sam> Form more information on on licensing and trial versions of the software, please contact your CDW Account Manager.

Company Description

Since 1989, Sassafras Software has provided software asset management products to some of the world's largest computer networks. K2's extensive auditing, license compliance, and reporting capabilities are built upon the foundation of KeyServer's 20+ year history of reliability

and compatibility. K2/KeyAuditor; KeyServer is a comprehensive solution for automated software auditing and software asset management.

K2 KeyAuditor & KeyServer

K2 is a cross platform solution for [Hardware and Software Asset Management](#) in a heterogeneous computing environment. The management console integrates configuration and report generation for seamless management of desktop, laptop, and virtual computers running Windows, Macintosh, Linux, and Solaris operating systems. K2's recent [CODiE Award for "Best Asset Management Solution"](#) attests to its elegant and flexible design coupled with its robust and scalable implementation.

For over 20 years Sassafras technology has been a critical part of software compliance and cost reduction efforts by major corporate, academic and government organizations worldwide. Sassafras enjoys broad support from software publishers, including many technical partners that rely exclusively on K2-KeyServer technology.
