

Information Industry Summit (IIS)

The SIIA Information Industry Summit is the information industry's flagship conference to address important strategic issues and network with decision makers, bringing together an audience of senior executives from content, media and information companies.

Content VIA Platforms (VIA)

This conference is dedicated to understanding how publishers, media and information companies need to think about designing product and distribution strategies across platforms (mobile, tablet, social, aggregation and other platforms) to maximize audience, customers and revenue.

SIIA Strategic and Financial Investment Conference

This conference is a unique, invitation-only event that connects established, mid-market, and innovative early-stage companies with more than 200 strategic M&A-focused executives and financial sponsors. Presenting companies are all seeking a 'next stage' opportunity, which could include an add-on acquisition, strategic partnership, round of investment, or exit.

DataContent Conference

Now in its 20th year, DataContent is the primary meeting ground for publishers to get in-depth and up-close look at the new ideas, new business models and innovative new companies that are defining the business of business information and data.
