SIIA Announces Finalists for 2012 CODiE Awards in Business Software

119 Finalists Selected in 25 Categories

Washington, D.C. (March 19, 2012) - The Software & Information Industry Association (SIIA), the principal trade association for the software and digital content industries, today announced the finalists for its 27th annual CODiE Awards in business software categories. The winners will be announced on Thursday, May 10, at the CODiE Awards Presentations held in conjunction with the SIIA's annual [All About the Cloud conference](#).

Nominated products were extensively reviewed by executives with deep industry expertise who acted as judges to select the finalists. These products were reviewed through live demonstrations, trial access, and supplementary documentation. One hundred and nineteen finalists have been selected in 25 categories, listed below.

This year's highlights include:

- The category with the highest number of nominations was Best Cloud Application/Service.
- The category with the most growth was Best Business or Competitive Intelligence Solution.
- The company with the most finalists in the business software categories was NetSuite, with four.

Rhianna Collier, Vice President of the SIIA Software Division, commended the companies that qualified as finalists: "All of this year's CODiE Awards finalists should feel proud of making it to this stage. We're pleased with all of this year's nominees, and the finalists reflect excellence and innovation in the business software industry."

SIIA members will now select the winners from among the finalists during the SIIA member voting phase of the program that takes place from March 26-April 13. Software members include the companies developing the applications, services, infrastructure and tools that are driving the software and services industry forward. As such, the CODiE Awards hold the distinction of being the industry's only peer-reviewed awards program.

The CODiE Awards, originally called the Excellence in Software Awards, were established in 1986 by the Software Publishers Association (SPA), now SIIA, so pioneers of the then-nascent software industry could evaluate and honor each other's work. Since then, the CODiE Awards has carried out the same purpose - to showcase the software and information industry's finest products and services and to honor excellence in corporate achievement.
